

# Well Visit Exam & Vaccination Schedule

As part of good preventative health care, your child should be seen by one of our providers at the following ages. A complete physical will be performed on your child at each scheduled well visit. Weight, length, and head circumference will be measured on all children 2 ½ years and younger. Weight, height, and blood pressure will be measured on all children 3 years and older.

We do not recommend an alternative vaccination schedule. If you wish to pursue a different schedule, we encourage you to discuss this with your provider. You may be asked to sign a waiver in our office on the day of your visit.
